Profile

Joseph Compton is president of Core Information Management, Inc., an IT Audit and IT Security Management firm headquartered in Cleveland, Ohio. With over 20 years of IT Management Experience, Joseph has spent the past seven years focused on IT security and compliance issues for the Financial Services Industry.

As both a CISA (Certified Information Systems Auditor) and a CISSP (Certified Information Security Professional), Joseph's consulting practice is focused in three main areas: IT Security Audit and Penetration Testing; IT Policy and Security Program Development; Risk Assessment Facilitation and Business Continuity Planning. Both Certifications are ANSI and ISO accredited, and each require 40 hours of continuing education a year to remain in good standing.

His national consulting practice includes work for financial institutions of every size. Joseph conducts an average of 40 IT security audits a year, as well as numerous SOX testing engagements. Other projects that Joseph leads are IT security program development projects, Business Continuity Planning projects, IT strategic planning, and IT Infrastructure Assessments. Clients appreciate Joseph's ability to make complex IT issues clear so that non-technical managers can own and manage the compliance programs with confidence.

Joseph is an active speaker at state and national bank conventions, national training seminars, and colleges. Most recently, Joseph developed an on-line Business Continuity Planning seminar for Bankinfosecurity.com, a leading source of regulatory information and training for community bankers.

He stays current in the field with coursework from the SANS Institute and ISACA, both are recognized internationally as providers of world class IT security and IT audit training. He is also an active member of the Northeast Ohio ISACA chapter (the Information Systems Audit and Control Association), and he is a member of the SANS institute's advisory board, and a member of the Cleveland chapter of Infragard.

A 1989 graduate of John Carroll University with a B.A. in English and History, Joseph lives in Moreland Hills, Ohio with his wife and five children.
